

TABLE OF CONTENTS

Chapter 1: Fundamentals of VLSI Design	01-33
1.1 Introduction to VLSI Technology	
1.2 Evolution of Integrated Circuits	
1.3 CMOS Technology Overview	
1.4 VLSI Design Flow and Hierarchy	
1.5 Technology Scaling and Moore's Law	
1.6 Applications of VLSI in Modern Electronics	
Chapter 2: Semiconductor Physics and MOS Devices	34-69
2.1 Semiconductor Fundamentals	
2.2 PN Junction and MOS Capacitor	
2.3 MOSFET Structure and Operation	
2.4 CMOS Device Characteristics	
2.5 Short-Channel Effects and Scaling	
2.6 Device Reliability and Performance	
Chapter 3: CMOS Logic Design	70-94
3.1 CMOS Inverter Design	
3.2 Static CMOS Logic Gates	
3.3 Dynamic CMOS Logic Circuits	
3.4 Combinational Logic Design	
3.5 Sequential Logic Design	
3.6 Logic Optimization Techniques	
Chapter 4: VLSI Fabrication and Physical Layout	95-130
4.1 Silicon Wafer Fabrication Process	
4.2 Photolithography and Etching Techniques	Type equation here.
4.3 Diffusion, Ion Implantation, and Metallization	
4.4 CMOS Layout Design and Stick Diagrams	
4.5 Design Rules and Layout Verification	
4.6 Semiconductor Packaging Technologies	
Chapter 5: HDL-Based Digital System Design	131-170
5.1 Introduction to Verilog HDL	
5.2 Behavioral and Structural Modeling	

5.3 RTL Design Methodology	
5.4 Simulation and Functional Verification	
5.5 FPGA-Based Design Flow	
5.6 ASIC Design Methodology	
Chapter 6: Timing, Power, and Testing	171-210
6.1 Delay and Timing Analysis	
6.2 Clock Distribution Techniques	
6.3 Power Dissipation in CMOS Circuits	
6.4 Low-Power VLSI Design Techniques	
6.5 Design for Testability (DFT)	
6.6 Fault Modeling and Built-In Self-Test (BIST)	
Chapter 7: Memory Design and Embedded VLSI Systems	211-255
7.1 Semiconductor Memory Fundamentals	
7.2 SRAM and DRAM Architectures	
7.3 ROM and Flash Memories	
7.4 Cache Memory Organization	
7.5 Embedded Memory Design	
7.6 Memory Applications in Digital Systems	
Chapter 8: Physical Design Automation and EDA Tools	256-301
8.1 Electronic Design Automation (EDA) Overview	
8.2 Logic Synthesis and Optimization	
8.3 Floor Planning and Placement	
8.4 Clock Tree Synthesis and Routing	
8.5 Design Rule Check (DRC) and LVS	
8.6 GDSII Generation and Tape-Out Process	
Chapter 9: Advanced VLSI Architectures	302-359
9.1 System-on-Chip (SoC) Design	
9.2 Network-on-Chip (NoC) Architectures	
9.3 FPGA and ASIC Design Comparison	
9.4 Mixed-Signal and Analog VLSI	
9.5 AI and Machine Learning Hardware Accelerators	
9.6 Chiplet and Heterogeneous Computing Architectures	

Chapter 10: Applications and Future Trends in VLSI

360-418

10.1 Consumer Electronics Applications

10.2 VLSI in Communication Systems

10.3 Automotive and Industrial Electronics

10.4IoT and Edge Computing Hardware

10.5Nanoelectronics and Quantum VLSI

10.6 Future Trends in Semiconductor Technology
