

CONTENTS

Chapter 1: Mathematical Foundations for Artificial Intelligence	1-36
1.1 Role of Mathematics in Artificial Intelligence and Machine Learning	
1.2 Sets, Relations and Functions	
1.3 Mathematical Formulation of Machine-Learning Problems	
1.4 Mathematical Notation Used in AI	
1.5 Applications of Mathematical Modeling in AI	
Chapter 2: Linear Algebra for AI and Machine Learning	37-61
2.1 Linear Independence, Basis and Dimension	
2.2 Matrix Decomposition	
2.3 Singular Value Decomposition	
Chapter 3: Optimization Techniques for Machine Learning	62-104
3.1 Newton and Quasi-Newton Methods	
3.2. Adam and Adaptive Optimization	
3.3. Optimization in Deep Learning	
Chapter 4: Information Theory and Mathematical Learning Theory	105-147
4.1 Fundamentals of Information Theory	
4.2 Empirical and Expected Risk	
4.3 Generalization and Model Complexity	
4.4. Information Theory Applications in Artificial Intelligence	
Chapter 5: Numerical Methods and Computational Mathematics	148-181
5.1 Numerical Computation for Artificial Intelligence	
5.2. Numerical Solutions of Linear Systems	
5.3 Numerical Optimization	
5.4 Computational Mathematics for Machine Learning	
Chapter 6: Mathematical Foundations of Deep Learning	182-229
6.1 Neural Networks as Mathematical Functions	
6.2. Gradient-Based Learning	
6.3. Regularization in Deep Learning	
6.4 Mathematical Foundations of CNNs	
6.5 Mathematical Foundations of Attention and Transformers	

Chapter 7: Advanced Mathematical Topics for AI

230-277

7.1 Multivariate Gaussian distribution

7.2 Information Theory

7.3 Dimensionality Reduction

7.4 Manifolds and Representation Learning
