

CONTENTS

Chapter 1: Introduction to Sickle Cell Disease	1-19
1.1 Introduction to blood and hemoglobin	
1.2 History of sickle cell disease	
1.3 Global epidemiology	
1.4 Burden of disease in India	
1.5 National Sickle Cell Elimination Mission	
Chapter 2: Genetics and Molecular Basis	20-37
2.1 Structure and function of hemoglobin	
2.2 Genetics of hemoglobinopathies	
2.3 Mutation in the β -globin gene	
2.4 Inheritance patterns	
2.5 Sickle cell trait vs. sickle cell disease	
Chapter 3: Pathophysiology of Sickle Cell Disease	38-52
3.1 Formation of sickled red blood cells	
3.2 Polymerization of HbS	
3.3 Vaso-occlusion mechanisms	
3.4 Hemolysis and anemia	
3.5 Inflammation and endothelial dysfunction	
Chapter 4: Clinical Manifestations	53-77
4.1 Acute clinical complications	
4.2 Chronic complications	
4.3 Pain crises	
4.4 Acute chest syndrome	
4.5 Stroke and neurological complications	
Chapter 5: Diagnosis and Laboratory Investigations	78-102
5.1 Clinical diagnosis	
5.2 Blood investigations	
5.3 Peripheral blood smear	
5.4 Hemoglobin electrophoresis	
5.5 High-performance liquid chromatography (HPLC)	

Chapter 6: Medical Management	103-123
6.1 Principles of treatment	
6.2 Pain management	
6.3 Hydroxyurea therapy	
6.4 Blood transfusion therapy	
6.5 Exchange transfusion	
Chapter 7: Comprehensive Patient Care	124-148
7.1 Multidisciplinary care model	
7.2 Pediatric care	
7.3 Adult transition care	
7.4 Nutrition and lifestyle	
7.5 Psychological counseling	
Chapter 8: Public Health and Community Care	149-171
8.1 Screening programs	
8.2 Genetic counseling	
8.3 Carrier detection	
8.4 Community awareness	
8.5 Rural healthcare challenges	
Chapter 9: Advanced Therapeutics	172-191
9.1 Stem cell transplantation	
9.2 Gene therapy	
9.3 Gene editing (CRISPR)	
9.4 Novel pharmacological therapies	
9.5 Precision medicine	
Chapter 10: Artificial Intelligence and Digital Health	192-213
10.1 AI in diagnosis	
10.2 Machine learning for disease prediction	
10.3 Medical image analysis	
10.4 Wearable health monitoring	
10.5 Telemedicine
