

CONTENTS

Chapter 1: Introduction to Green and Sustainable Computing	1-38
1.1 Evolution of Computing and Sustainability	
1.2 Fundamentals of Green Computing	
1.3 Sustainable Development Goals (SDGs) and Information Technology	
1.4 Environmental Impact of Computing	
1.5 Carbon Footprint and Digital Carbon Emissions	
 Chapter 2: Energy-Efficient Computing Systems	 39-72
2.1 Energy Consumption in Computing Devices	
2.2 Green Hardware Design Principles	
2.3 Low-Power Processors and Embedded Systems	
2.4 Power Management Techniques	
2.5 Energy-Efficient Storage Systems	
 Chapter 3: Sustainable Software Engineering	 73-102
3.1 Green Software Engineering Principles	
3.2 Sustainable Software Development Life Cycle (SSDLC)	
3.3 Energy-Efficient Programming Techniques	
3.4 Green Algorithms and Optimization	
3.5 Software Sustainability Metrics	
 Chapter 4: Green Data Centers and Cloud Computing	 103-127
4.1 Data Center Architecture	
4.2 Energy-Efficient Data Centers	
4.3 Green Cloud Computing	
4.4 Virtualization and Containerization	
4.5 Renewable Energy-Powered Data Centers	
 Chapter 5: Green Networks and Communication Systems	 128-155
5.1 Green Networking Concepts	
5.2 Energy-Efficient Communication Protocols	
5.3 5G and 6G Sustainable Networks	
5.4 Software Defined Networking (SDN)	
5.5 Green Internet of Things (IoT)	

Chapter 6: Artificial Intelligence for Sustainable Computing	156-180
6.1 AI for Energy Optimization	
6.2 Machine Learning in Resource Management	
6.3 AI-Based Smart Data Centers	
6.4 Intelligent Power Management Systems	
Chapter 7: Circular Economy and Electronic Waste Management	181-208
7.1 Circular Economy Concepts	
7.2 Electronic Waste (E-Waste)	
7.3 Recycling and Resource Recovery	
7.4 Sustainable Manufacturing	
Chapter 8: Sustainable Computing Infrastructure	209-230
8.1 Smart Buildings and Green IT Infrastructure	
8.2 Renewable Energy Integration	
8.3 Smart Grids and Sustainable Computing	
8.4 Edge Computing for Sustainability	
Chapter 9: Green Computing Standards, Policies, and Security	231-259
9.1 Green IT Standards	
9.2 Environmental Regulations and Compliance	
9.3 ESG Frameworks and Sustainability Reporting	
9.4 Green Cybersecurity	
Chapter 10: Emerging Technologies in Sustainable Computing	260-286
10.1 Quantum Computing and Sustainability	
10.2 Carbon-Aware Computing	
10.3 Digital Twins for Sustainable Systems	
10.4 Blockchain for Green Applications
