

CONTENTS

CHAPTER 1: Introduction to Microbiology	1-14
1. History of Microbiology	
2. Branches of Microbiology	
3. Importance of Microbiology in Healthcare	
CHAPTER 2: Microscopy and Laboratory Equipment	15-37
1. Types of Microscopes	
2. Parts and Working of Compound Microscope	
3. Electron Microscope	
4. Laboratory Glassware	
5. Biosafety and Laboratory Safety Measures	
CHAPTER 3: Microbial Cell Structure	38-58
1. Prokaryotic and Eukaryotic Cells	
2. Bacterial Cell Structure	
3. Capsule, Cell Wall, Flagella and Pili	
4. Bacterial Growth Curve	
5. Nutrition and Metabolism	
CHAPTER 4: Sterilization and Disinfection	59-88
1. Sterilization Methods	
2. Autoclave	
3. Hot Air Oven	
4. Filtration	
5. Radiation Sterilization	
6. Chemical Disinfectants	
CHAPTER 5: Immunology	89-121
1. Immunity	
2. Antigens and Antibodies	
3. Innate and Acquired Immunity	
4. Vaccines	
5. Hypersensitivity	
6. Autoimmune Diseases	

CHAPTER 6: Bacteriology	122-149
1. Classification of Bacteria	
2. Gram Positive Bacteria	
3. Gram Negative Bacteria	
4. Pathogenesis of Bacterial Diseases	
5. Laboratory Diagnosis	
CHAPTER 7: Virology	150-174
1. Structure of Viruses	
2. Viral Replication	
3. DNA and RNA Viruses	
4. Hepatitis Viruses	
5. HIV	
6. Influenza	
7. COVID-19	
CHAPTER 8: Mycology	175-189
1. Fungi and Their Characteristics	
2. Yeasts and Molds	
3. Candidiasis	
4. Aspergillosis	
5. Dermatophytosis	
CHAPTER 9: Parasitology	190-205
1. Protozoa	
2. Helminths	
3. Malaria	
4. Amoebiasis	
5. Giardiasis	
6. Filariasis	
CHAPTER 10: Clinical Microbiology	206-223
1. Collection and Transport of Clinical Specimens	
2. Urine Culture	
3. Blood Culture	
4. Stool Examination	
5. Sputum Examination	
6. Antimicrobial Susceptibility Testing	

CHAPTER 11: Hospital Infection Control**224-237**

1. Nosocomial Infections
2. Biomedical Waste Management
3. Hand Hygiene
4. Infection Prevention
5. Universal Precautions

CHAPTER 12: Applied and Environmental Microbiology**238-250**

1. Water Microbiology
2. Food Microbiology
3. Air Microbiology
4. Wastewater Microbiology
5. Emerging Issues: Antimicrobial Resistance and Microplastics
