

TABLE OF CONTENTS

Unit No.	Title	Page No.
1	Foundations of Pharmacology and Biomedical Sciences	01-36
	1.1 Introduction to Pharmacology	
	1.2 Historical Development of Pharmacology	
	1.3 Scope and Importance of Pharmacology in Biomedical Sciences	
	1.4 Drug Classification and Nomenclature	
	1.5 Sources and Types of Drugs	
	1.6 Essential Medicines and Rational Drug Use	
	1.7 Overview of Drug Discovery and Development	
	1.8 Regulatory Agencies and Drug Approval Processes	
2	Principles of Pharmacokinetics	37-75
	2.1 Introduction to Pharmacokinetics	
	2.2 Drug Absorption Mechanisms	
	2.3 Drug Distribution and Tissue Compartments	
	2.4 Plasma Protein Binding	
	2.5 Drug Metabolism and Biotransformation	
	2.6 Drug Elimination and Excretion	
	2.7 Pharmacokinetic Models and Parameters	
	2.8 Bioavailability and Bioequivalence	
3	Principles of Pharmacodynamics	76-112
	3.1 Fundamentals of Pharmacodynamics	
	3.2 Drug-Receptor Interactions	
	3.3 Receptor Classification and Signal Transduction	
	3.4 Agonists and Antagonists	
	3.5 Dose-Response Relationships	
	3.6 Potency, Efficacy, and Therapeutic Index	
	3.7 Drug Tolerance and Dependence	
	3.8 Drug Synergism and Antagonism	
4	Molecular and Cellular Pharmacology	113-149
	4.1 Molecular Basis of Drug Action	
	4.2 Enzymes as Drug Targets	
	4.3 Ion Channels and Transporters	
	4.4 Cell Signaling Pathways in Pharmacology	
	4.5 Genomic and Proteomic Approaches	
	4.6 Biomarkers and Molecular Diagnostics	

	4.7 Pharmacogenomics and Personalized Therapy	
	4.8 Systems Pharmacology	
5	Autonomic Nervous System Pharmacology	150-186
	5.1 Organization of the Autonomic Nervous System	
	5.2 Cholinergic Neurotransmission	
	5.3 Cholinergic Agonists and Antagonists	
	5.4 Adrenergic Neurotransmission	
	5.5 Adrenergic Agonists and Antagonists	
	5.6 Neuromuscular Blocking Agents	
	5.7 Drugs Affecting Autonomic Ganglia	
	5.8 Clinical Applications of Autonomic Drugs	
6	Cardiovascular and Renal Pharmacology	187-226
	6.1 Pharmacology of Hypertension	
	6.2 Antianginal Drugs	
	6.3 Drugs for Heart Failure	
	6.4 Antiarrhythmic Agents	
	6.5 Anticoagulants and Antiplatelet Drugs	
	6.6 Diuretics and Renal Pharmacology	
	6.7 Lipid-Lowering Agents	
	6.8 Cardiovascular Drug Safety and Monitoring	
7	Central Nervous System Pharmacology	227-271
	7.1 Neurotransmitters and Synaptic Transmission	
	7.2 General and Local Anesthetics	
	7.3 Sedatives and Hypnotics	
	7.4 Analgesics and Opioids	
	7.5 Antiepileptic Drugs	
	7.6 Antidepressants and Antipsychotics	
	7.7 Drugs for Neurodegenerative Disorders	
	7.8 Substance Abuse and Drug Dependence	
8	Endocrine and Metabolic Pharmacology	272-318
	8.1 Hormones and Endocrine Regulation	
	8.2 Insulin and Antidiabetic Drugs	
	8.3 Thyroid and Antithyroid Drugs	
	8.4 Corticosteroids and Anti-inflammatory Hormones	
	8.5 Reproductive Hormones and Contraceptives	
	8.6 Drugs for Osteoporosis	
	8.7 Obesity and Metabolic Disorder Pharmacotherapy	
	8.8 Endocrine Drug Monitoring	

9	Anti-Infective Pharmacology	319-371
	9.1 Principles of Antimicrobial Therapy	
	9.2 Antibiotics and Antibacterial Agents	
	9.3 Antiviral Drugs	
	9.4 Antifungal Agents	
	9.5 Antiparasitic Drugs	
	9.6 Antitubercular and Antileprosy Drugs	
	9.7 Antimicrobial Resistance Mechanisms	
	9.8 Rational Use of Antimicrobials	
10	Biomedical Drug Delivery Systems	372-433
	10.1 Fundamentals of Drug Delivery	
	10.2 Conventional Drug Delivery Routes	
	10.3 Controlled and Sustained Release Systems	
	10.4 Nanotechnology in Drug Delivery	
	10.5 Liposomes and Nanocarriers	
	10.6 Hydrogels and Biomaterials for Drug Delivery	
	10.7 Implantable and Smart Drug Delivery Devices	
	10.8 Targeted Drug Delivery Technologies	
11	Computational Pharmacology and Future Perspectives	434-472
	11.1 Bioinformatics in Pharmacology	
	11.2 Computer-Aided Drug Design	
	11.3 Molecular Docking and Virtual Screening	
	11.4 Artificial Intelligence in Drug Discovery	
	11.5 Machine Learning for Pharmacological Research	
	11.6 Digital Health and Computational Therapeutics	
	11.7 Emerging Biopharmaceutical Technologies	
	11.8 Future Directions in Biomedical Pharmacology and Precision Medicine	
	References	473-474
